INFORMAZIONI TECNICHE AGGIUNTIVE

Ultra Ariostea prevede un certo numero di facce differenti, a parità di prodotto, per creare una gradevole variabilità estetica nella posa. In fase di approntamento dell'ordine la selezione delle facce è random quindi la venatura continua tra i pezzi ordinati non è garantita. Ultra è un prodotto derivante dalla combinazione della terra con il fuoco. La eventuale continuità di venatura tra un pezzo e l'altro è soggetta alla tolleranza tipica dei prodotti naturali.

ZUSÄTZLICHE TECHNISCHE INFORMATIONEN

Ultra Ariostea - sieht eine gewisse Anzahl verschiedenartig gestalteter Oberflächen für dasselbe Produkt vor, um damit ansprechende ästhetische Variablen beim Verlegen erzielen zu können. Bei der Zusammenstellung der Bestellung wird die Auswahl der Oberflächen dem Zufall überlassen, sodass ein gleichförmiger Verlauf der Maserung zwischen den bestellten Stücken nicht gesichert ist. Ultra- ist ein Produkt, das aus dem Zusammenspiel von Erde und Feuer entstammt. Der eventuell kontinuierliche Verlauf der Maserung zwischen dem einem und dem anderen Stück unterliegt der typischen Toleranz von natürlichen Produkten.

ADDITIONAL TECHNICAL INFORMATION

Ultra Ariostea, compared with an equal product, provides a number of different faces, to create a pleasant aesthetic variability in the laying. In the order preparation phase, the face selection is random and therefore the continuous veining between the ordered pieces is not guaranteed. Ultra is a product derived from a combination of earth with fire. The continuous veining between pieces is subject to the typical variation of natural products.

INFORMATION TECHNIQUE SUPPLÉMENTAIRE

Ultra Ariostea prévoit un certain nombre de faces différentes, pour un même produit, pour créer une agréable variabilité esthétique dans la pose. En phase de préparation de la commande, la sélection des faces est aléatoire donc le grain continu entre les pièces commandées ne peut pas être garanti. Ultra est un produit dérivé de la combinaison de la terre et du feu. La continuité éventuelle dans le grain entre une pièce et une autre est soumise à la tolérance typique des produits naturels.
